

Connecting using Eduroam networks Mac OSX

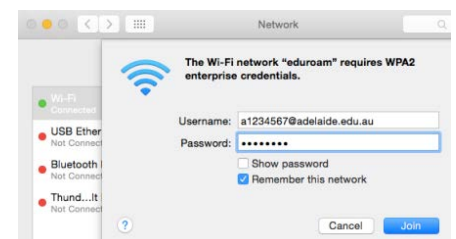

Introduction

This guide will assist you in connecting to the eduroam network, which allows you to connect to over more than half of Australian universities with your UofA credentials. **It is important to note that the username for this network is slightly different than your normal UofA wireless credentials.**

It is strongly recommended that you connect to the eduroam network while on a UofA campus before attempting the connection elsewhere.

Procedure

1. Click the Apple Icon ()
2. Select 'System Preferences' from the menu
3. Choose Network
4. Select Wi-Fi, and then select 'eduroam' from the Network Name drop down menu
5. After selecting 'eduroam', enter your university username:
a1234567@adelaide.edu.au
6. Then enter in your password and click 'Join'
7. You will now see Eduroam show as 'Connected'.
